

Rocks and Fossils

If you study them closely, rocks have clues that can tell us about the past. Examine each layer in the rock wall and identify the fossils below. What clues do these fossils give you about habitats in the past?

Exogyra oyster

Crinoid

Mastodon tooth

Turtle shell

Lepidodendron
(fossil tree)

Rocks and Fossils

Look carefully at the rocks in several of the habitats in *NatureQuest*. How are they alike and different?

Ocean

Swamp

River

Pine flatwoods

Waterfall
